

Water or Wastewater Issues?

Florida Utility Group has complete solutions.

When it comes to clear solutions for your water or wastewater facilities, those that combine proven experience with up to date expertise, from designing and building your facility to its operation, no other provider can match Florida Utility Group, LLC. Our principals have owned and operated systems for over twenty years and assisted many other water and wastewater providers during that time.

Our experience over the years has shown that it's not easy to stay current with all of the new laws and regulations governing water and wastewater, but that's just what Florida Utility Group does. Continuing education is one of the most important factors

in Florida Utility Group's ability to deliver unparalleled service. Our personnel are required to stay current by upgrading their certifications and maintaining their educational credits on a regular basis.

When you partner with Florida Utility Group you get the added benefit of an association with its affiliated companies. Together, we can offer the talents of a multi-disciplined staff of over 50 employees. This staff includes planners, computer specialists, plant operators, and maintenance personnel. Working as a team, their unified effort gives Florida Utility Group the ability to solve your complex issues with solutions unique to your situation. So take a moment to review our services and see how they can add to your operation's efficiency and effectiveness.

Florida Utility Group will bring your system into compliance and keep it there by tailoring any of our services to meet your specific needs. While you put your resources to work doing what you do best, Florida Utility Group will do what we do best - work around the clock to bring you and your community piece of mind. Give us a call today and tomorrow you can sleep well because you've put Florida Utility Group. on the job.

Inspection Services

In an era of fast-track construction, limited budgets and increased governmental and industry regulation, the need for independent, objective third-party inspection and qualification of your critical systems is paramount. Florida Utility Group, LLC. offers a complete turnkey source of on-site inspectors to insure your project is designed and installed to meet your material and workmanship requirements and contract specifications.

Florida Utility Group, LLC. personnel can provide construction observation and management on a variety of public works, environmental and utility projects. Our managers and staff are experienced in providing on-site observation and project oversight, and because they have done it themselves, they recognize potential problems in the field quickly allowing an early response, which minimizes construction delays and overruns for your project.

Services

- Assisting owners in finding qualified contractors
- Value Engineering Review - Analysis of Life Cycle Costs
- Reviewing and Certifying Payment Requests from Contractors
- Field Inspection Services
- Preparation of as-built drawings

Large System Management

Florida Utility Group, LLC. provides full-service operation of your water system around-the-clock, 7 days a week insuring you are in compliance with all water and/or wastewater system related laws, including the Safe Drinking Water Act, specific state regulations, and any other applicable local regulations. Water quality (color, odor, taste and health-related contaminants) will be maintained at the highest levels of purity attainable by your treatment and distribution system equipment. Loss of water pressure and other system issues under our control will be minimized.

Florida Utility Group will operate, maintain, repair and manage your system in a safe, secure and efficient manner. We will also coordinate all necessary laboratory testing services using a state certified facility. The operation of your water system will meet or exceed all regulatory requirements including public health standards for water quality.

Florida Utility Group stands behind this pledge and will be responsible for any fines or penalties levied by any government agency as a result of our actions.

Small System Management

Small water and wastewater systems serving as few as 25 people will find meeting local, state and federal regulations a costly proposition at best. Florida Utility Group, LLC. offers a comprehensive, cost-effective solution combining skilled facility management with certified technical knowledge that satisfies all regulatory requirements facing our customers.

Florida Utility Group will perform all of the necessary sampling, testing and analyses to insure your system is in compliance with all regulatory agencies concerned. We will also submit all documentation that your state or municipality requires and are prepared to carry out any other service, with your approval, to insure the proper operation of your facility.

A certified laboratory will perform any analysis not done in-house. For this purpose, Florida Utility Group. has retained a highly qualified state certified laboratory to insure effective analysis of your water and wastewater. Their statement of qualification is available upon your request.
