Water or Wastewater Issues?

Gator has complete solutions.

When it comes to clear solutions for your water or wastewater facilities, those that combine proven experience with up to date expertise, from designing and building your facility to its operation, no other provider can match Gator Water & Wastewater Management, Inc. (Gator). Our principals have owned and operated systems for over twenty years and assisted many other water and wastewater providers during that time.

Our experience over the years has shown that it's not easy to stay current with all of the new laws and regulations governing water and wastewater, but that's just what Gator does.

Continuing education is one of the most important factors in Gator's ability to deliver unparalleled service. Our personnel are required to stay current by upgrading their certifications and maintaining their educational credits on a regular basis.

When you partner with Gator you get the added benefit of an association with its affiliated companies. Together, we can offer the talents of a multi-disciplined staff of over 50 employees. This staff includes planners, computer specialists, plant operators, and maintenance personnel. Working as a team, their unified effort gives Gator the ability to solve your complex issues with solutions unique to your situation. So take a moment to review our services and see how they can add to your operation's efficiency and effectiveness.

Gator will bring your system into compliance and keep it there by tailoring any of our services to meet your specific needs. While you put your resources to work doing what you do best, Gator will do what we do best - work around the clock to bring you and your community piece of mind. Give us a call today and tomorrow you can sleep well because you've put Gator on the job.

Cross Connection

The United States Environmental Protection Agency (EPA) and your state's environmental regulatory agency mandate that all water suppliers have a Cross Connection Control and Backflow Prevention Program. Gator Water & Wastewater Management, Inc. (Gator) has an approved program that is professionally administered by our seasoned field technicians to meet this requirement for you.

We've established a strong track record of responsibility while surveying systems and testing devices for many communities. All of our technicians that perform mandatory testing hold valid Backflow Prevention Device Tester's Certification and are completely familiar with today's ever-changing regulatory environment. These professionals will insure that your system is in compliance.

Our vehicles are clearly marked with "Gator Water & Wastewater Management, Inc.". Each vehicle is equipped with all of the tools and accessories necessary to complete mandatory scheduled tasks, including backflow device test kits and confined space entry equipment.

Gator manages its cross connection-testing program using the latest computer software. This allows us to customize your letters, forms, or other correspondence required by the responsible governing agency. Gator submits all of your required monthly and annual reporting along with any other necessary documentation. We provide this service promptly and completely relieving you of the regulatory paperwork requirements.

Services

- Cross Connection Surveys
- Backflow Device Testing
- Submission of Required Documents
- Tracking of all Survey, Testing and Device Information
